GENERATOR:  
ARROW GEAR COMPANY  
2301 CURTIS STREET  
DOWNERS GROVE, IL 60515

In accordance with the Heritage Waste Analysis Plan and as required by federal environmental regulations (40 CFR 264.13 and 268.7), a periodic evaluation of all active wastestreams approved into a Heritage facility must be performed. The purpose of the evaluation is to determine if any physical or chemical changes have occurred in the process generating each wastestream. All wastestreams for which the generating process has changed will be re-evaluated. Wastestreams will be canceled if no response is received by Heritage. Please return this ENTIRE form to the address at the top of the page or fax to (317) 486-2580. If you have any questions or would like additional information, please contact your Technical Sales Representative or Customer Service at 800/827-0476.

If your generating process has changed AND you want to keep this wastestream active, a sample kit will be sent to your attention. This must be returned, tested, and approved before you can send your next shipment.

The following wastestreams have been shipped to Heritage within the last 12 months or are new wastestreams that have been profiled, but have not been shipped in the last 12 months.

-----  
For each wastestream listed below, please circle the appropriate answer.

Wastestream #	Common Name/ Generating Process	Has the generating Process changed?
31384-1	COPPER STIPPING SOLUTION STRIPPING/CLEANING OF PARTS	yes <u>no</u>

I certify the above information, to the best of my knowledge and belief, is true and accurate.
